

Have your say on South Yorkshire, Bassetlaw and Chesterfield Hospital Services Review

Work has now begun to look at how some hospital services are provided and what needs to happen to make sure they can continue to provide great care when it is getting harder to find the staff they need, and as demands on health and care increase because we are living for longer (which is good news, but means we need to provide different care to keep ourselves living well).

This work will not look at closing any of the current general hospitals in South Yorkshire, Bassetlaw or Chesterfield.

Five hospital services are the focus of this work, these are:

- Care during pregnancy and for mother-and-baby (Maternity)
- Care when you need it unexpectedly (Urgent and Emergency Care)
- Care for poorly children who need a hospital service
- Care for people who have a stroke
- Care for stomach and intestine conditions including investigations (Gastroenterology and endoscopy)

If you would like it, you can find more detailed information on the review on our website:

<https://www.healthandcaretogethersyb.co.uk/what-we-do/working-together-future-proof-services/looking-at-hospital-services>

This is your opportunity to get involved in shaping what future services will look like. Your thoughts are important to us and will help us to focus the work we do. Please use additional sheets of paper if you don't have room to complete your answers.

Firstly, please tell us if you are answering as a:

Member of the public

Member of staff

(if staff, please state your organisation)

Which area are you answering from? (please circle)

Barnsley / Bassetlaw / Chesterfield / Doncaster / Rotherham / Sheffield

1. Have you or a member of your family used (or worked in) any of the following services in the last two years? (please tick any that apply)

Care during pregnancy and for mother-and-baby (Maternity)

Urgent and Emergency care (care when you need it unexpectedly)

Care for poorly children who need a hospital service

Care for people who have a stroke

Care for stomach and intestine conditions

None (Even if you have no personal experience of these services we would still value your thoughts on question 4)

2. Please tell us what made your experience of this service/s good

Some ideas might include: the nurses, doctors and other staff you met; the care you received; how easy it was to get an appointment; the information you were given; your understanding of what would happen next.

Also please tell us about anything else that meant you had a positive experience.

3. Please tell us if you think there is anything we could have done differently or better with the service you received.

Again you could use the ideas from question 2, but also please tell us about anything else that is important to you or a relative.

4. We are looking at how we could deliver services differently or better in the future. This question is looking for your opinion as a member of the public rather than a patient, so you **do not have to have experienced the service** to give your opinions on what you think would make these services the best they could be.

In your opinion what would make care during pregnancy and for mother-and-baby (Maternity) the best it could be?

In your opinion what would make care when you need it urgently (Urgent and Emergency Care) the best it could be?

In your opinion what would make care for poorly children who need a hospital service the best it could be?

In your opinion what would make care for people who have a stroke the best it could be?

In your opinion what would make care for stomach and intestine conditions including investigations (Gastroenterology and endoscopy) the best it could be?

5. In relation to the five services we have been asking about, have you had or seen any examples of excellent care anywhere else in the last two years? If so please tell us about it:

Please complete the section below. This will help us to make sure that we speak to a broad range of people by allowing us to target engagement with groups and individuals who we haven't been able to speak to.

1. What age are you?					
0-15	16-24	25-34	35-44	45-54	
55-64	65-74	75-84	85+	Prefer not to say	
2. What is your sex?	Male	Female	Intersex	Prefer not to say	
3. Have you gone through any part of a process, or do you intend to (including thoughts or actions) to bring your physical sex appearance, and/or your gender role, more in line with your gender identity?					
Yes	No	Prefer not to say			
4. Which of the following options best describes your sexual orientation?					
Heterosexual/ Straight	Gay	Lesbian	Bisexual	Other	Prefer not to say
